Any suggestion about the syllabus:

25 responses

We teach maximum topics in minimum time.

Need to include more applicable/ applied resources and practical information in the practical syllabus

1. There is a scope to improve the Syllabus further and also can be made more job oriented.

More option of practical should be included

ITS GOOD ENOUGH FOR OUR STUDENTS.

Need for implementation of vocational base knowledge in the course.

We receive less time to complete syllabus

It should be focused to meet employability

Need to focus to incorporate more applied areas in zoological science for skill enhancement and better employability.

Content of the syllabus should be reduce in each semester.. It is impossible for students to cover whole syllabus within a short period.

Content of the syllabus should be reduce in each semester. It is impossible for the students to cover whole syllabus within a short period of time.

Syllabus should be reduce .

High quality resource material must be made available

The MAJOR course in Physics is student friendly if the student opts for research in the subject. This will be the only option left for students once they get the degree. They will find problem in applying numerous jobs due to the subject combination in the course.

No

Syllabus updating is necessary from time to time.

High quality study resources must be made available in the college

High quality of resources are needed specially e-books

The syllabus is too large in comparison to the time period given

बृहत syllabus होने के कारण समयानुसार कोर्स पूर्ण होना सम्भव नहीं है।

All syllabus should be designed in accordance to the present educational policies and employability aspect!

Syllabus is too vast to be completed within 6 months.

Need to make more up to date syllabus.

More local issues should be accommodated in the syllabus.

Syllabus is good but required materials are not available
